

**SUN FOOD TECH**

... The Magic of Colors

## About Us

Sun Food Tech is one of the leading manufacturers and exporters of food colors and lake colors, primarily for application in Pharmaceuticals, Food and Cosmetics Industries for more than 40 years. We are one of the pioneers in the market and have an experienced and proficient workforce that has successfully maintained stability in quality. With state-of-the-art production unit and large production capacity, our clients have a variety of products to choose from. All our products are sternly tested for quality and hygiene.

Some of our most well known brands include "Sun Brand", "Arun Brand" and "Ace Brand" with a range of well accepted products like Primary Food Colors, Blended Food Colors, Lake Colors, Caramel, Natural Colors, Baking Powder, Essence and Flavours etc. Our commodious infrastructure is developed to carry out business endeavours in the most efficient manner. The stress on quality is not just a mission statement but it is translated into practice by acquiring the best technical skills, well equipped laboratory and an up to mark plant suitable for producing world class edible colors. All our products are sternly tested for quality. Our highly advanced machines and equipment have enabled us to cater to the growing demands of our products in domestic as well as international markets and offer custom-made products as per the specific needs and requirements of the customers.

We have been successful in our endeavour to reach out to the global market. We are one of the leading exporters of food colors in the world primarily due to our focus on quality of our products. The fully equipped R&D Department and skilled technical team consistently attempt to improve the products. The ISO 9001:2008, HACCP, WHO:GMP, FSSAI certifications earned by our range of products speak for itself.

## Our Vision

Our vision for the future is to become an internationally competitive organization in terms of volumes, quality, costs and profits. We shall not only retain our market share and goodwill in India but should be amongst global players in our chosen sphere of activity. Our work culture, our thinking and actions have to be in consonance with this vision.

## Our Mission

To provide a wide range of products that meet international standards using state-of-the-art technology and scientific approach to quench the needs of customers. We believe in a clean and safe environment in the workplace and emphasis upon the finest quality of products for our clients.

## Synthetic Food Colors

We are one of the leading manufacturers, suppliers and exporters of an exclusive array of Primary Food Colors. Primary Food Colors are basic colors and are widely used as additives, to dress up the Food products thereby making them visually more appealing. They are in purest form as they are processed in Hygienic Conditions to make them food grade color for Human Consumption.

For over four decades, we have been supplying complete range of Superior Quality of Primary Food Colors, under our Leading Brand "SUN", to our esteemed International and National Clients requirements. Our food colors have high utilitarian value & are vastly used dyes in the pharmaceutical, food, cosmetic & various other industries.

## Lake Colors

Customers can avail from us an impeccable range of Lake Colors, . These are oil soluble colours thereby insoluble in water and only dissolves in oil products. They are relatively inert absorption compounds therefore are very adaptable and versatile. Because of their good solubility, any product can be colored with them. These colours are widely used to make Food Products more shining and appealing. The offered range is developed under the supervision of our experts for their better future results.

## Natural Food Colors

Natural food colour is any dye, pigment or any other substance obtained from vegetable, mineral that is capable of coloring foods or drugs. Colors come from variety of sources like seeds, fruits, vegetables, grass, beetroot, and turmeric are some of the natural sources from which colours are extracted.

Another very important characteristic of the natural food colors is that they are safe to use as food additives. Since they are natural derivatives, they are free of any harmful side effects. Natural food colors are popularly food additives that can be found in everyday consumption products. Our natural food colors are produced under extremely hygienic conditions and are available at most competitive price.
